"PLEX-A-GUARD"® TRAFFIC SAFETY MIRRORS

PLEXIGLAS PROTECTED

"PLEX-A-GUARD"® TRAFFIC SAFETY MIRRORS
are recommended for use in:

- FOOD PROCESSING PLANTS
- OUTDOOR INSTALLATIONS
- INDOOR INSTALLATIONS
- OVER MACHINERY
- AT BLIND CORNERS

where mirrors are required, yet danger from breakage is a factor. The transparent PLEXIGLAS® cover over the face of the regular mirror acts as a permanent shield, yet does not impair the true mirror reflection. It will normally deflect all objects that would accidentally come in contact with it.

All the necessary mounting brackets are included in the package. A patented ball and socket SWIVEL ASSEMBLY on the back adjusts to any viewing angle. Permanent locking position is obtained by tightening three screws. Rubber frames and waterproof backs are standard equipment.
